[VICRL] Victoria Rules

Service Flow(2 errors)

Obter Contexto e SubContexto RAD (1 error)

- The external service 'CERNService' is unavailable. Make sure it exists in the process application or toolkit. If it exists in another toolkit, ensure that the toolkit is included as a dependency.
 - Removed box from service "CERN - Contexto e SubContexto RAD", and added again with "[CSP] Evaluate Rule" implementation and remapped parameters

Obter Perfis por Contexto e SubContexto RAD (1 error)

- The external service 'CERNService' is unavailable. Make sure it exists in the process application or toolkit. If it exists in another toolkit, ensure that the toolkit is included as a dependency.
 - Removed box from service "CERN - Contexto e SubContexto RAD", and added again with "[CSP] Evaluate Rule" implementation and remapped parameters

[CSP] Core Proxy Services

VALIDATION - Business Object(1 warning)

SendFileRequestType(1 warning)

- The 'metadata' name is also used as the name of a business object function. To retrieve or update the property value, you must call `getPropertyValue()` and `setPropertyValue()`. Consider using a different name.
- NOT-FIXED: Changes in i/o interface Will break, where component is used

VALIDATION - Service Flow(5 warnings)

Service Flow TESTE(2 warnings)

- No input parameter mapping found for parameter without default: aggregations
 - Changed input to null
- No input parameter mapping found for parameter without default: aggregationsOnly
 - Changed input to null

Generate Doc (1 warning)

- The 'metadata' name is also used as the name of a business object function. To retrieve or update the property value, you must call `getPropertyValue()` and `setPropertyValue()`. Consider using a different name.
- NOT-FIXED: Changes in i/o interface Will break, where component is used

Get File (1 warning)

- The 'metadata' name is also used as the name of a business object function. To retrieve or update the property value, you must call `getPropertyValue()` and `setPropertyValue()`. Consider using a different name.
- NOT-FIXED: Changes in i/o interface Will break, where component is used

Send File (1 warning)

- The 'metadata' name is also used as the name of a business object function. To retrieve or update the property value, you must call `getPropertyValue()` and `setPropertyValue()`. Consider using a different name.

[VICGC] Victoria Gestão de Contratos

VALIDATION - Service Flow(1 error)

GetBlackList(1 error)

- Must be valid JavaScript identifier. It has to start with letter or "*and to contain only letters, digits or "*
 - Added Error_Code to Error component

[VICCOT] Victoria Cotacoes

VALIDATION - Service Flow(1 error)

StartCoreWorkFlow(1 error)

- Must be valid JavaScript identifier. It has to start with letter or "*and to contain only letters, digits or "*
 - Added Error_Code to Error component

[TCV] Toolkit - Componentes Victoria

VALIDATION - Heritage Human Service(1 error, 12 warnings)

Date Time Picker Example(4 warnings)

- No input parameter mapping found for parameter without default: `iEvento`
 - Changed input to null
- No input parameter mapping found for parameter without default: `iSelectedAplicacao`
 - Changed input to null
- No input parameter mapping found for parameter without default: `iSelectedSistema`
 - Changed input to null
- No input parameter mapping found for parameter without default: `iSelectedUser`
 - Changed input to null

Selection Example(1 error)

- Selection 2 is unreachable: [64.1b42173f-4288-40d3-9e62-c9417ea883a7:1b42173f-4288-40d3-9e62-c9417ea883a7]. Make sure it exists in the process application or toolkit. If it exists in another toolkit, ensure that the toolkit is included as a dependency.
 - Removed unavailable view from coach

Test Filtering Select(4 warnings)

- No input parameter mapping found for parameter without default: iDate
 - Changed input to null
- No input parameter mapping found for parameter without default: iSelectedUser
 - Changed input to null
- No input parameter mapping found for parameter without default: pageParams
 - Changed input to null
- No input parameter mapping found for parameter without default: user
 - Changed input to null

Teste Validações(4 warnings)

- No input parameter mapping found for parameter without default: iEvento
 - Changed input to null
- No input parameter mapping found for parameter without default: iSelectedAplicacao
 - Changed input to null
- No input parameter mapping found for parameter without default: iSelectedSistema
 - Changed input to null
- No input parameter mapping found for parameter without default: iSelectedUser
 - Changed input to null

VALIDATION - View(2 errors)

DocumentListExt(1 error)

- Obter Descricao Propriedades is unreachable: [processId:e56dc9ae-de52-4e01-b7e4-229a6b285275]. Make sure it exists in the process application or toolkit. If it exists in another toolkit, ensure that the toolkit is included as a dependency.
 - remmapped configuration service to "Obter Descrição Propriedades"

DocumentListExt BACKUP(1 error)

- Obter Descricao Propriedades is unreachable: [processId:e56dc9ae-de52-4e01-b7e4-229a6b285275]. Make sure it exists in the process application or toolkit. If it exists in another toolkit, ensure that the toolkit is included as a dependency.
 - remmapped configuration service to "Obter Descrição Propriedades"
